

# The BOU's **Database of Ornithological Institutes**

We've had an excellent response to our request for details of ornithological institutes around the world with the details of nearly 200 institutes contributed in the first two weeks of the project.

Below are the details (institute/dept/country only) of those institutes received to date (we've removed some duplicates). Please add your own institute, or your former institute if you see it is not listed below, and encourage your friends at other institutes to take part too. Thank you.
